

6G wireless networks

Connectivity and more for 2030 and beyond

Wireless-access generations

Connectivity truly everywhere
Beyond communication

6G focus areas

Communication beyond 5G

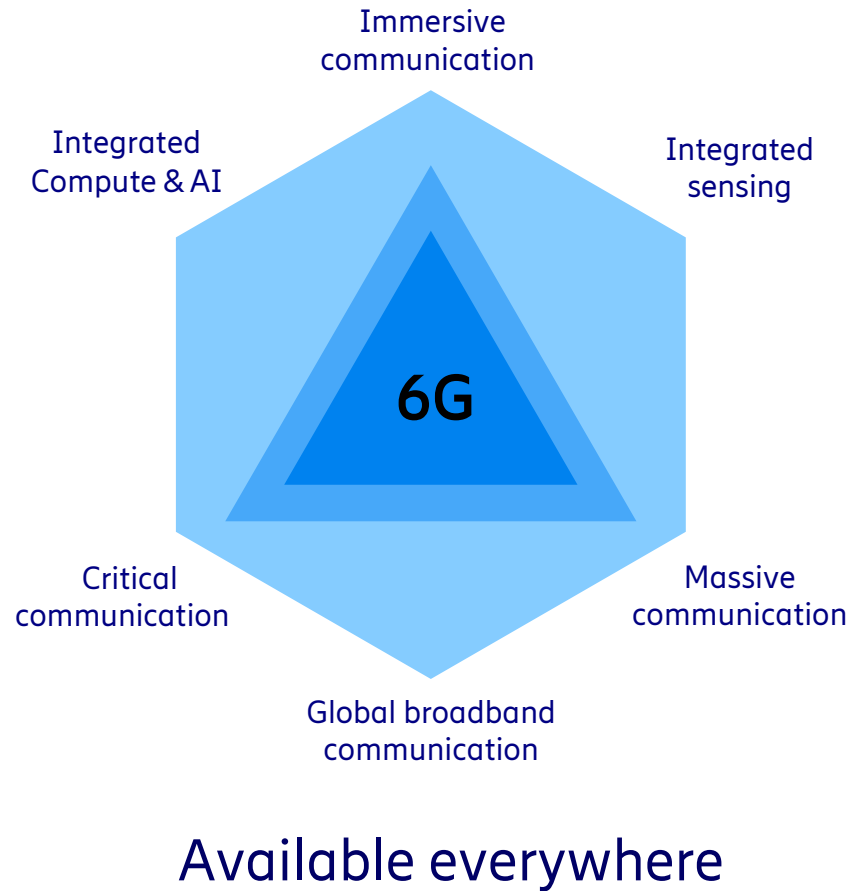

Immersive communication – expanding on eMBB

Critical communication – expanding on URLLC

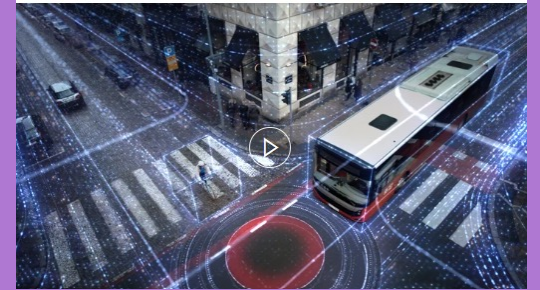

Massive communication – expanding on mMTC

Beyond-communication

New services on 6G platform

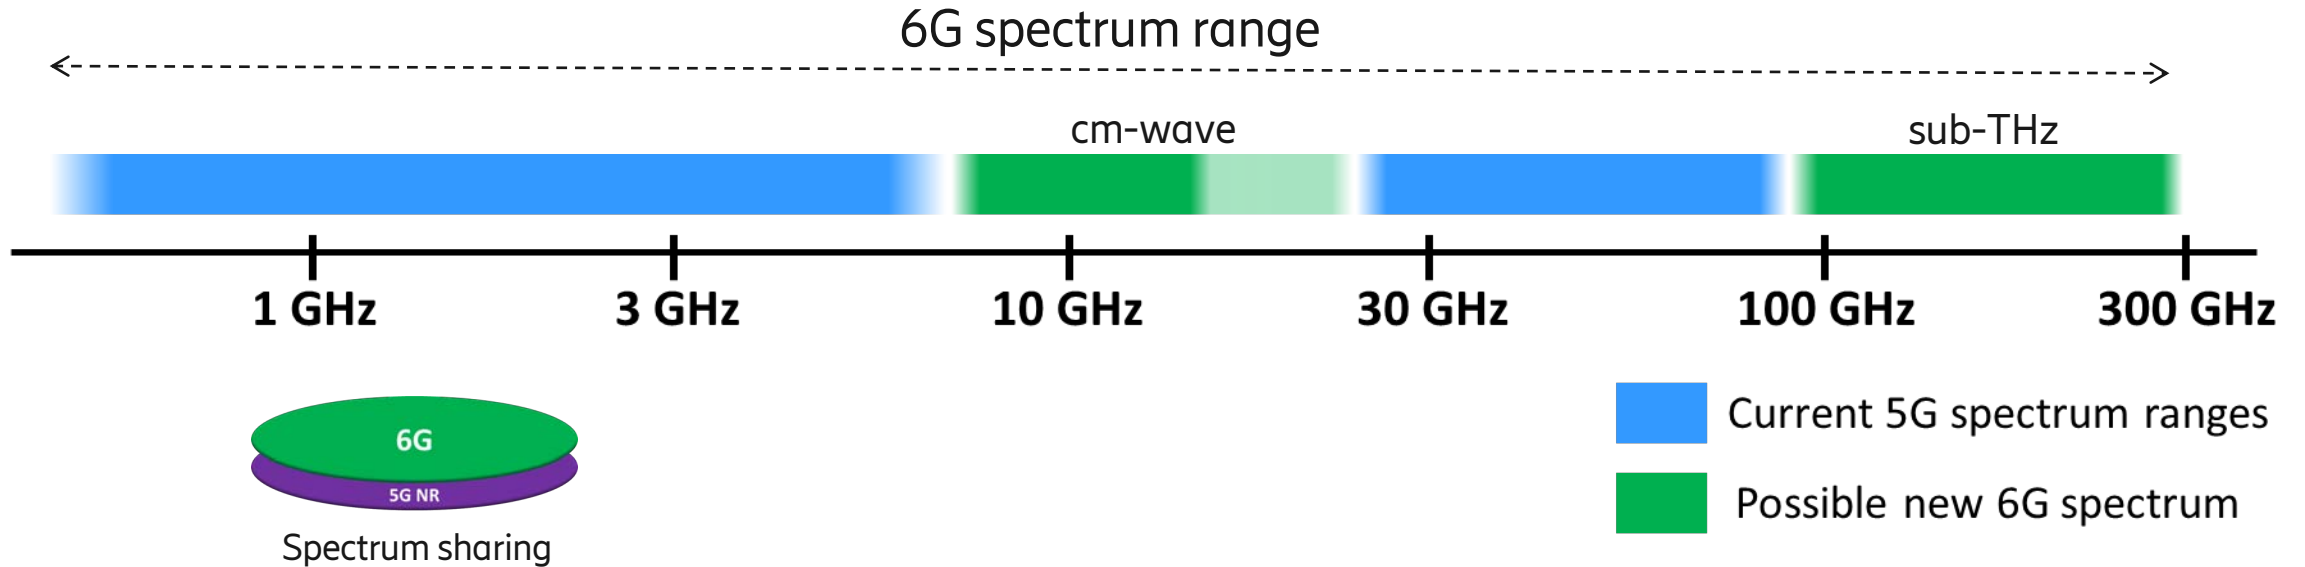

Sustainable and trustworthy

Sustainability and trust imperatives

6G spectrum

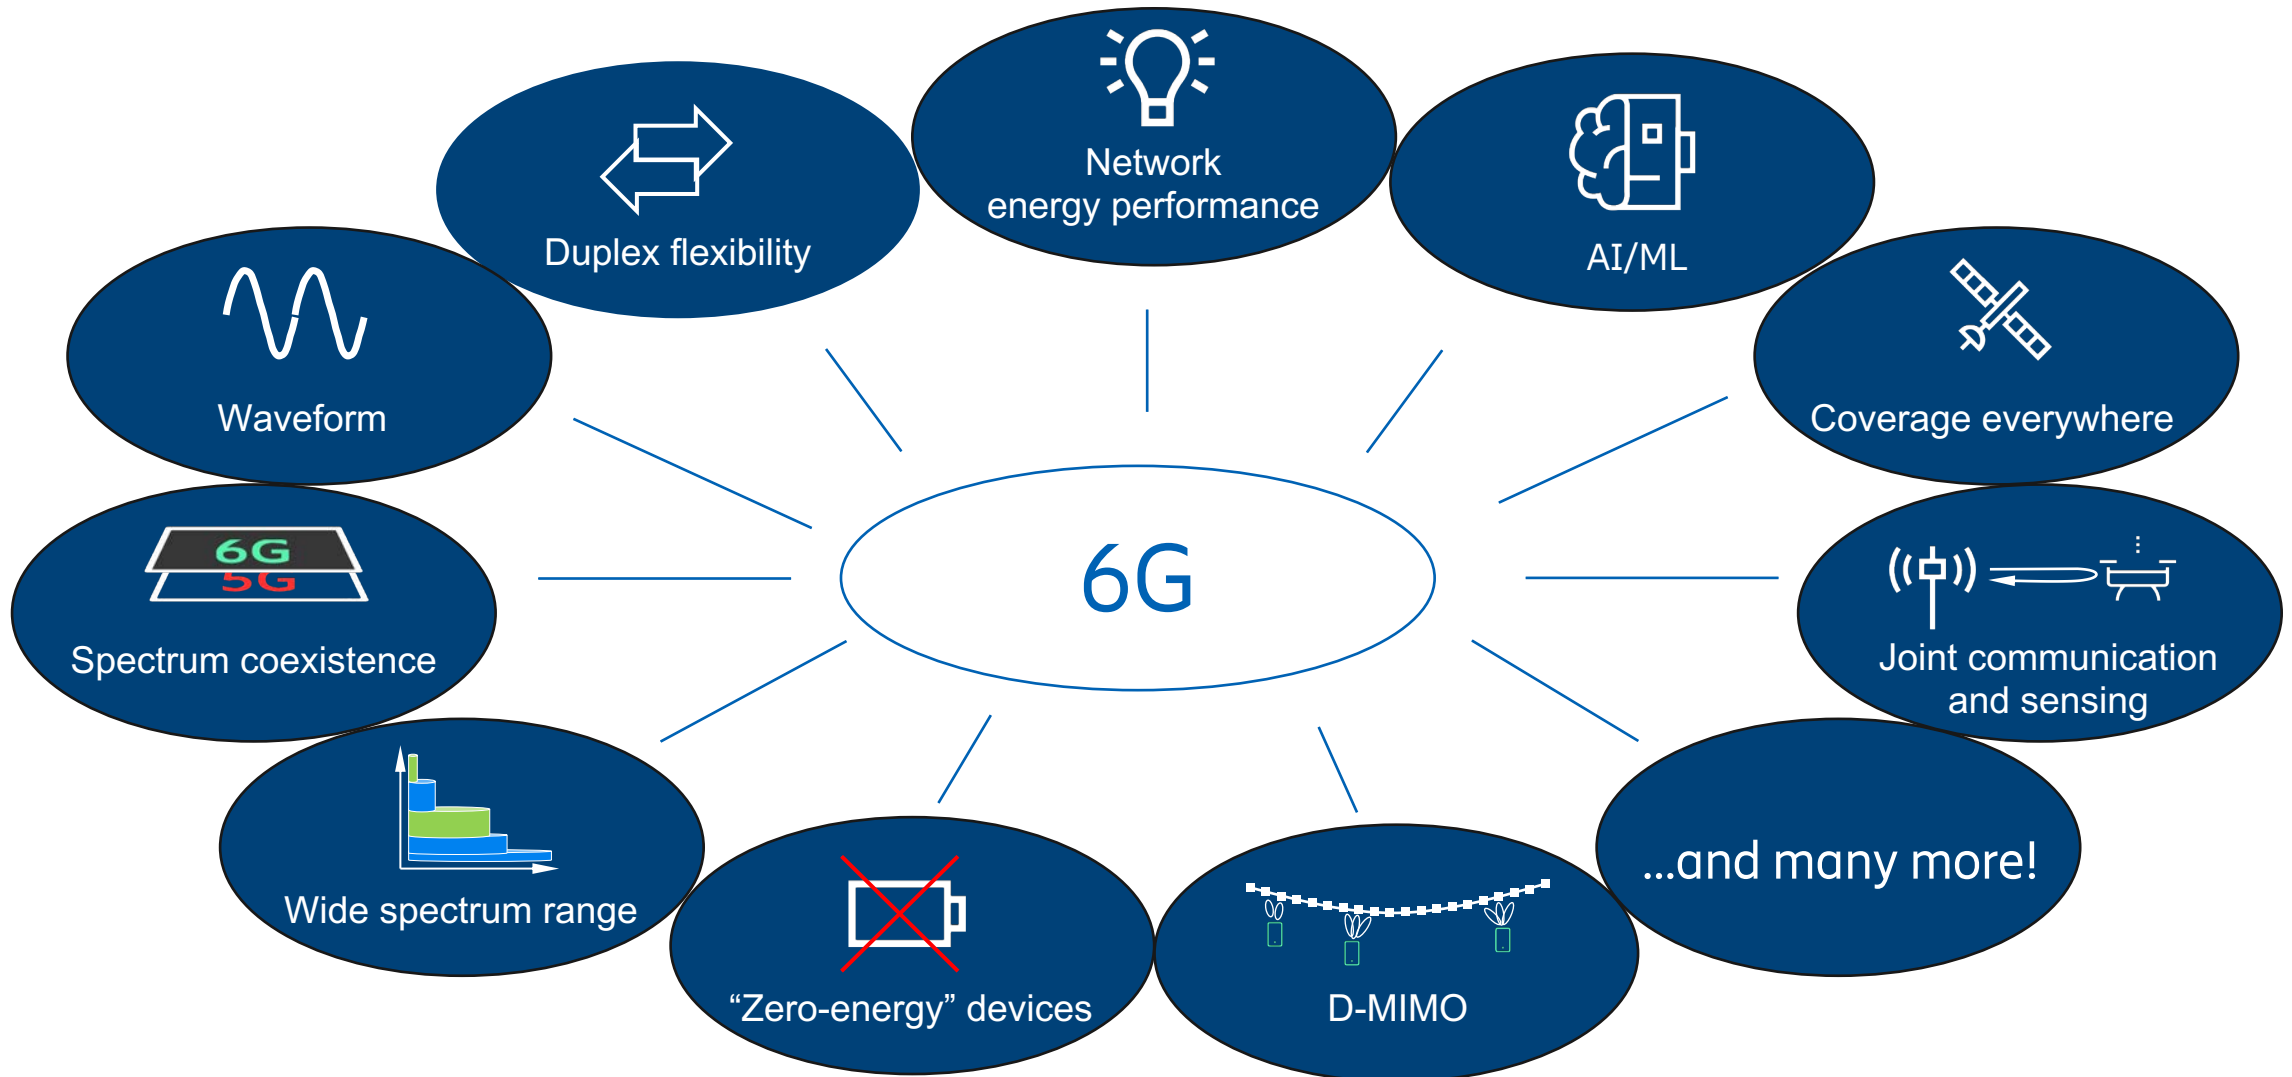

From below 1 GHz to beyond 100 GHz

Spectrum sharing with legacy 5G networks in lower bands

Conventionally licensed spectrum, local licenses and unlicensed spectrum

6G technology components

Thank you!
