

6G SNS

6G Architecture WG – On the Way to 6G

Dr. Ömer Bulakci (Chair, Nokia), Dr. Xi Li (Vice-chair, NEC)

EuCNC 2024, 03 June 2024

6G SNS 6G SNS
ARCHWG IA

- Five White Papers so far
- Wide Participation from 5GPPP

1 White Papers by Arch WG

2 5GPPP Collaboration

- Supporting other 5GPPP Initiatives
- White Papers & Dissemination thereof

3 WG Dissemination

- Workshops & Special Sessions
- Webinars

4 5GPPP Disseminations

- Collaborative Platform
- Global Footprint
- Cross-5GPPP Dissemination & Exploitation
- 6G Book (74K+ Downloads, May 2024)

5GArch 2019:
International Workshop on 5G Architecture

Workshop on “Architectural Evolution Toward 6G Networks: A European View”

2nd Workshop 2022 “Architectural Evolution toward 6G Networks – 6GArch”

- Five White Papers so far
- Wide Participation from 5GPPP

TOWARDS SUSTAINABLE AND TRUSTWORTHY 6G

Challenges, Enablers, and Architectural Design

Ömer Bulakçı, Xi Li, Marco Gramaglia, Anastasius Gavras, Mikko Uusitalo, Patrik Rugeland, and Mauro Boldi (Editors)

now

- Colla
- Globa
- Cross
- 6G B

- Led jointly by the 5G PPP Architecture WG and the Hexa-X project
- Input from **16 projects** and **183 contributors**
- Released on **06 June 2023** at EuCNC

TOWARDS SUSTAINABLE AND TRUSTWORTHY 6G
Challenges, Enablers, and Architectural Design

Editors:

Ömer Bulakçı, Xi Li, Marco Gramaglia, Anastasius Gavras, Mikko Uusitalo, Patrik Rugeland, and Mauro Boldi

ISBN: 978-1-63828-238-9

E-ISBN: 978-1-63828-239-6

DOI: 10.1561/9781638282396

Publisher: Now Publishers

74K+ Downloads
(27 May 2024)

1

Capitalize on

Proven well-running machinery since 2015

Existing work, e.g., white papers & the 6G book

2

Unite

Bring SNS projects together to attain the European view

Consolidate views on technical directions & concepts for the 6G architecture design

3

Disseminate

White Papers have been very successful

Disseminate via international events & via established Architecture Workshop series, i.e., 5GARCH & 6GARCH

4

Initiate

Consolidation is challenging

Already started the work as early as possible to timely align and adapt subjects

5

Collaborate

Strengthen cross-WG collaboration further

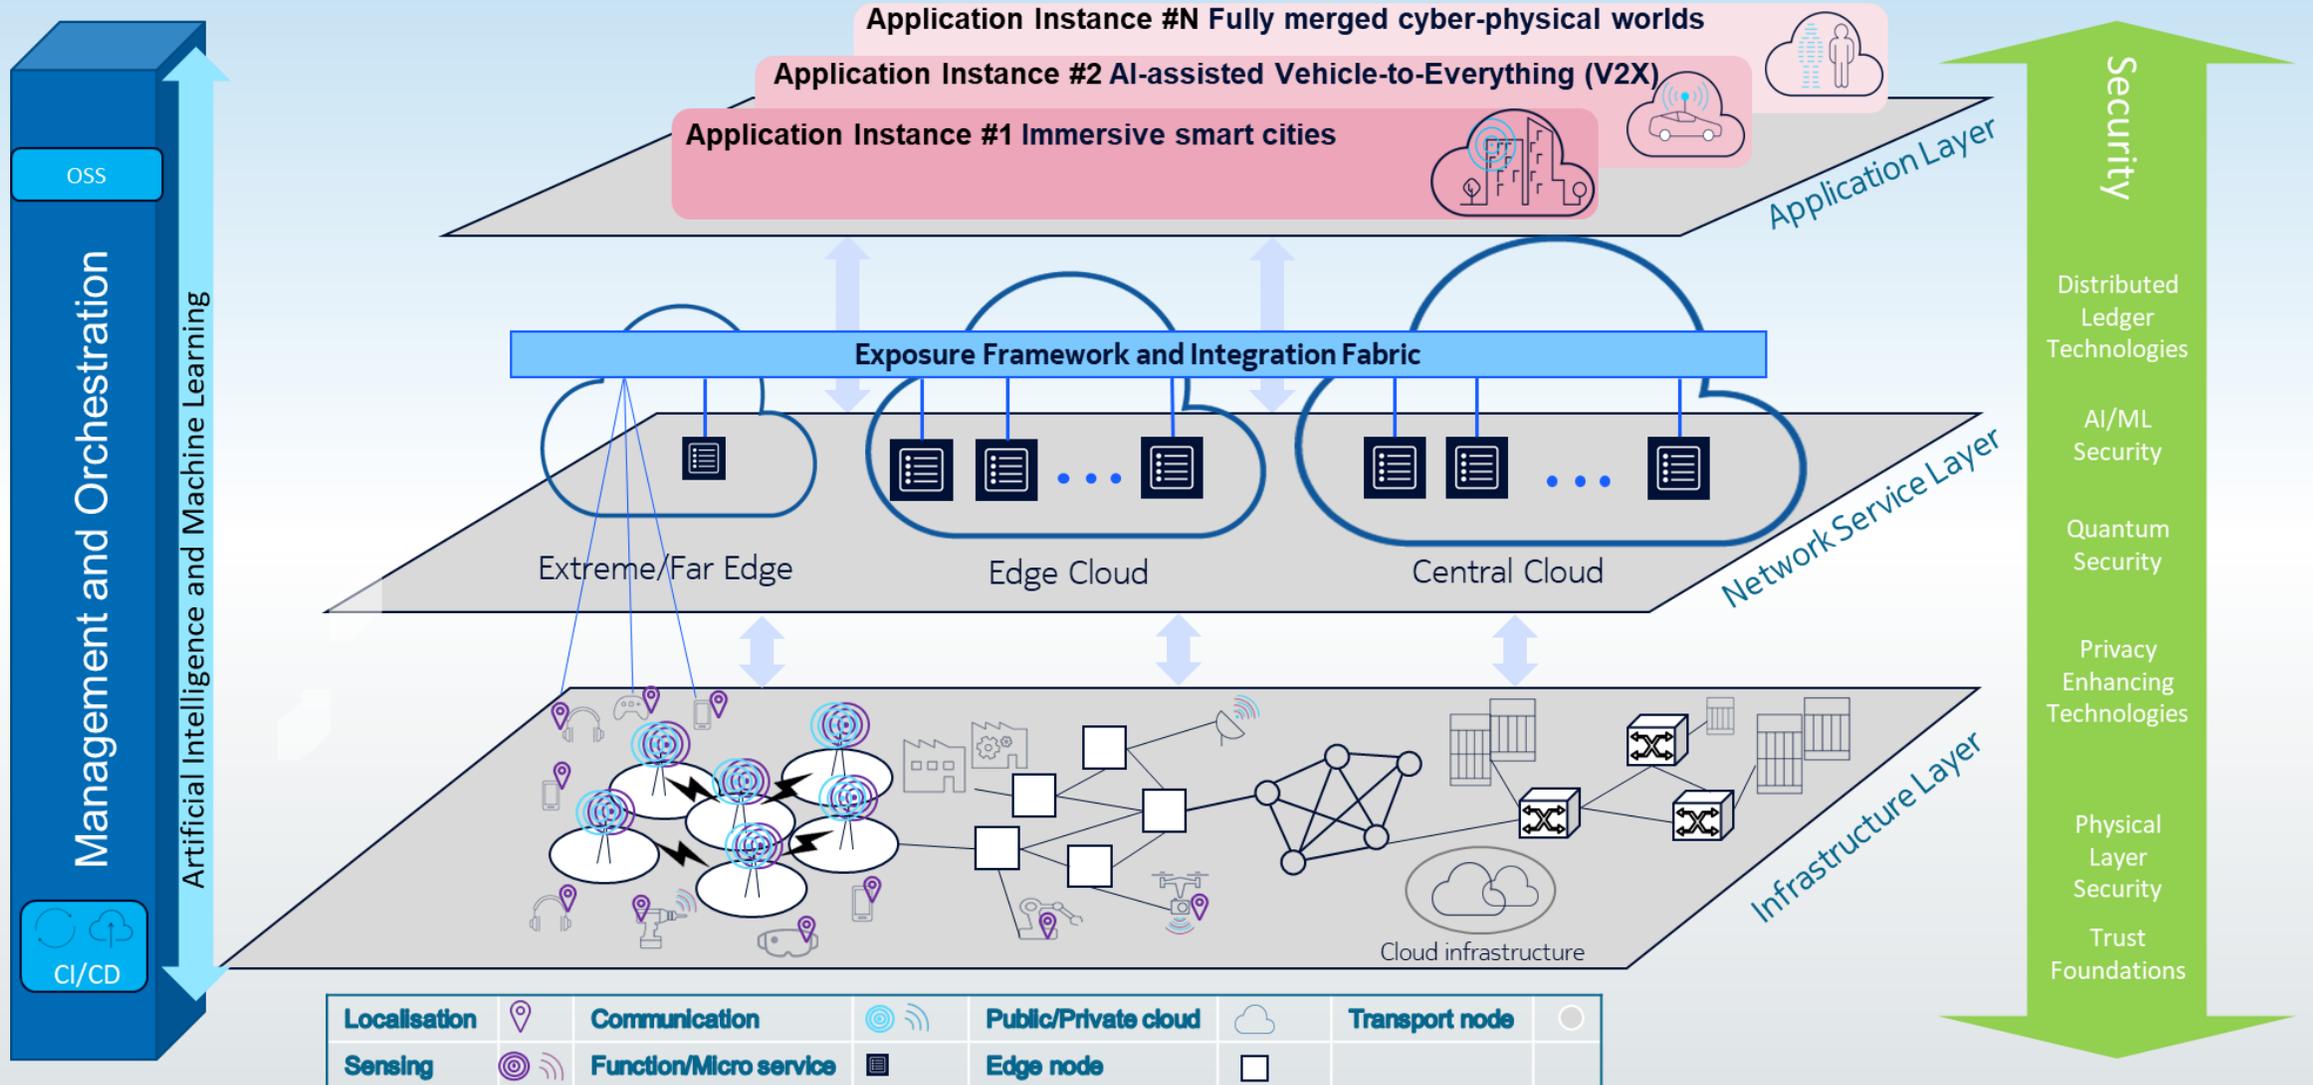

Promote cross-WG white papers & events

6

Expand

Global Footprint via bilateral workshops with research fora

Include 6G-IA members (non-voting if not project participants)

Localisation		Communication		Public/Private cloud		Transport node	
Sensing		Function/Micro service		Edge node			

AI-powered Immersive Communication

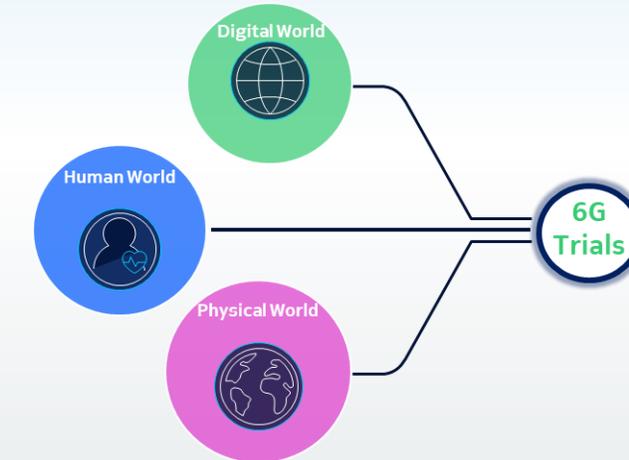

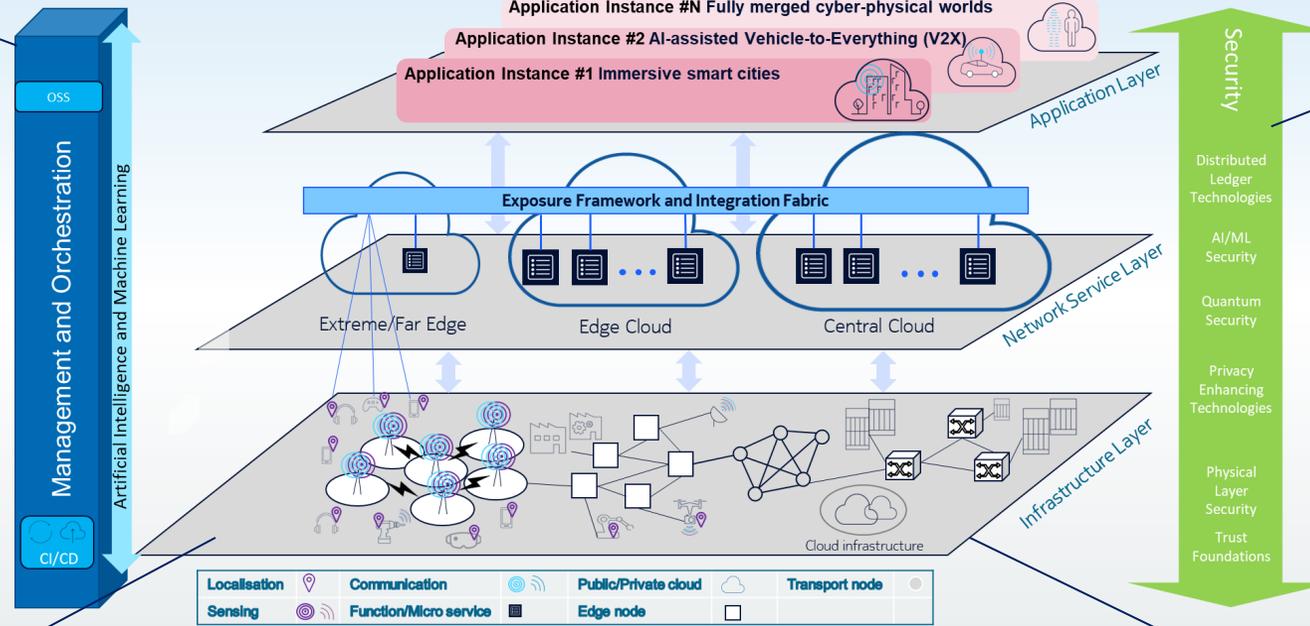

Support for Immersive XR, e.g., holographic teaching
 Joint computing & networking resource allocation
 AI & Analytics Engine Orchestration

Sustainable Massive Communications

Low-density LEO for massive IoT
 Decentralized implementation of UPF-CU-DU
 GPU-based acceleration for DU/RU Offloading

Secure, Reliable and Trustworthy AI & Communication

E2E Multi-domain Slicing as Mitigation Enabler
 PQC
 FL-based anomaly detection
 AI-driven Security Analytics

Ubiquitous Connectivity

TN-NTN Integration
 Unified RAN & Radio Interface
 Multi-link Connectivity
 RIS

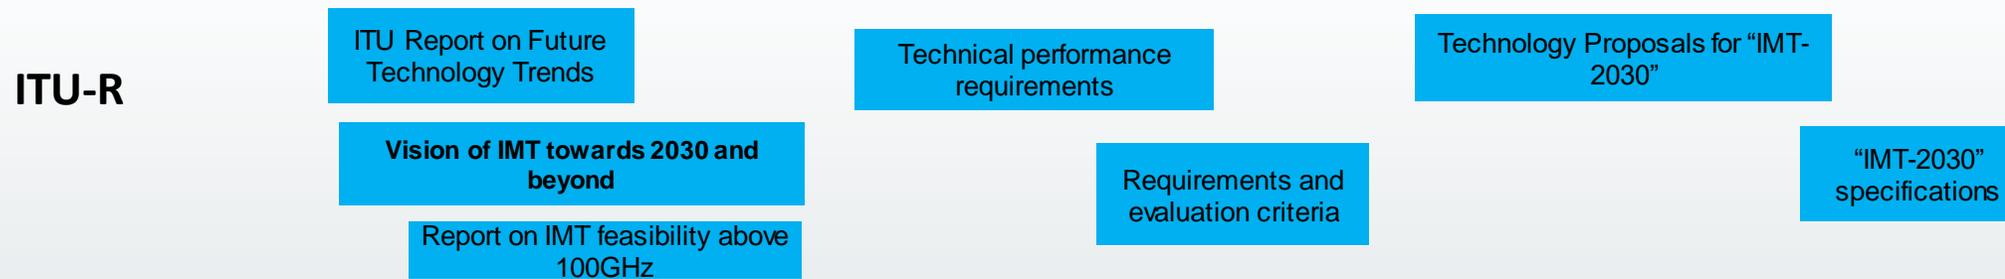

Dependable & Resilient Communications

Time-critical Automation
 Efficient & real-time network monitoring
 Multi-domain & multi-technology Deterministic Communications
 Predictable Packet Delay
 In-X Subnetworks

Integrated Sensing and Communications-Enabled 6G Networks

Enabling new use cases, e.g., beam tracking, VRUs sensing
 Joint Sensing & RIS Operation

Arch WG First White Paper from SNS JU

WRC-23 Agenda Item on New Bands

WRC-27 New Bands

1st 3GPP spec

Commercial Deployment

6G SNS

6TH GENERATION SMART
NETWORKS & SERVICES
